

**Health Monitoring:**

Daily Scan of your website to determine if hackers have injected malicious code on your site so you can take action before you infect your customers and/or get blacklisted by Google and others. This is different from detecting regular viruses that AV companies do.

Service	No. of Pages	Monthly (\$)	Yearly (\$) (20% off)
Health Monitoring 25	25	15	144
Health Monitoring 100	100	30	288
Health Monitoring 500	500	60	576
Health Monitoring 1000	1000	150	1440
Health Monitoring 2000	2000	250	2400
Health Monitoring 2000+	Unlimited	500	4800

**Vulnerability Assessment**

Weekly scan of your website to determine if your site is vulnerable so you can take action before a hacker breaks in and infects your website and/or customers. We check for XSS, SQLi, CSRF and more than 35,000 vulnerabilities. This service includes a daily scan for detecting live malicious code on your web site (Health Monitoring)

Service	No. of Pages scanned using Health Monitoring	No. of Vulnerability Assessments / mo	Monthly (\$)	Yearly (\$)
Vulnerability Assessment	200	4	100	960

**Reputation Monitoring:**

Daily Scan of your website to determine if your website is listed in any malware, spam, and DNS blacklists (E.G. Google, Microsoft, Yahoo, and others). Checks are also performed to check the reputation of your host, SSL certificates, IP address hosting your site.

Service	Monthly (\$)	Yearly (\$) (20% off)
Reputation Monitoring	10	96

**Google Blacklist Monitoring:**

Daily Scan of your website to determine if your website is blacklisted by Google. This service is free.
